Infrastructure

Authority

*Published in December 2020, the **Construction Playbook** captures commercial best practices and specific sector reforms outlining the government's expectations of how contracting authorities and suppliers, including the supply chain, should engage with each other.*

These are set out in 14 key policies for how the government should assess, procure and deliver public works projects and programmes which all central government departments and their arm's length bodies are expected to follow on a 'comply or explain' basis.

*This **Townhall webinar** will give companies from across the UK construction sector an opportunity to hear more about the Playbook and what it means for your business.*
