

CITB Health & Safety Awareness (HSA)

Accreditation	CITB
Course Duration	One Day
Certificate valid for	5 Years
Grant Available	Subject to CITB eligibility

Who should attend?

This course is designed to assist those who have just entered or are about to enter the construction and civil engineering industry in understanding the various hazards they may encounter on the job. Its goal is to provide a practical overview of issues related to health and safety, welfare, and environmental health and safety.

Course Information

Course Content

- Workers' individual responsibilities for their own safety and the safety of others
- Typical construction hazards and how these are controlled
- How everyone can help achieve better practical standards of safety on site
- Legal requirements and liabilities
- Working at height
- Manual handling
- Fire prevention
- Work equipment
- Occupational health

Entry Requirements

Learners must be competent in English at operative level. The course content is suited to all ability levels.

Learner Numbers

The maximum number of learners for this course is 20, with a minimum of 3.

Assessment

Learners' knowledge is assessed through an exam paper at the end of the course. Learners are also expected to actively participate during the course.

The exam lasts for 30 minutes and consists of 25 questions covering all aspects of the course. The pass mark is 83% (25 out of 30). Should a learner fail the exam, re-sit options may be available.

Certification

Those who successfully complete the course will receive a CITB Health & Safety Awareness certificate valid for 5 years.

CITB Grant Levy

Available – Subject to CITB eligibility
